

Sparkling Cobwebs Carpet Cleaning Service Packages

Preventative Care

The low cost choice you need a regular maintenance program

- Soiling check, fixings check, seams check and backing type check. (Inspection)
- Dye test to establish solutions choice.
- Fibre test to establish correct solution.
- Comb pile to separate and release matted pile for effective dust extraction.
- Power vacuum to extract dust and other residue turning into muddy residue.
- Treat any stains prior to main cleaning.
- Carry out chosen method of low or no moisture cleaning process.
- Groom carpet to realign pile to its correct position.
- Drying times should be less than 1 hour.

Salvage treatment

Maximum Deep Cleaning possible. Not always cost efficient for the reasons below.

This solution will be discuss in depth with you as to your options. It may be more economical for you to replace the carpet as it may not be possible to provide you with the results you expect and would be better to replace the carpet with a new one. A survey would be done and a detailed report would be done for you to enable you to make an informed decision. Results cannot be guaranteed on salvage processes and any undertaking would be by written consent from you as results cannot always be guaranteed.

Corrective care

Deep cleaning for normal to heavier soiling levels of your carpet

- Soiling check, fixings check, seams check and backing type check. (Inspection)
- Dye test to establish solutions choice.
- Fibre test to establish correct solution.
- Comb pile to separate and release matted pile for effective dust extraction.
- Power vacuum to extract dust and other residue turning into muddy residue.
- Treat stains to ensure full depth of stain is removed as feasibly possible.
- Pre-treatment spray and agitation to depth of soiling.
- Deep cleaning as per chosen method based on inspection and dye test results.
- Hand cleaning to all edges and inaccessible areas by chosen method.
- Realign pile and use high speed air dryers to speed up carpet drying time. Surgeons over shoes supplied to you.

We also offer domestic cleaning for your home, hardwood floor cleaning, carpet and upholstery cleaning and tile and grouted floor cleaning services. Ask our technician or call for details.

We will identify the type of carpet and the materials it is made from and pH test it so we can choose the correct process and cleaning solutions, so the condition of your carpet is not compromised. (This is an essential part of the process. Some carpets can only be dry treated.)
